Body Hacking

Body hacking is, like all the other forms of hacking, ultimately a form of volition: the freedom to enact your will upon a system.

Want a Sixth Sense?

The real change is here, not the finger. It's all down to Neuroplasticity

Oops.

I sing the Body electric;

The armies of those I love engirth me, and I engirth them; They will not let me off till I go with them, respond to them, And discorrupt them, and charge them full with the charge of the Soul.

Was it doubted that those who corrupt their own bodies conceal themselves; And if those who defile the living are as bad as they who defile the dead?

And if the body does not do as much as the Soul?

And if the body were not the Soul, what is the Soul?

And if the body were not the Soul, what is the Soul?

How do we engage in the making of a Self?

Whether we realize it or not, it's in the choices we make with our bodies.

The ridiculously obvious case of the body as self:

Gourmand Syndrome

"...symptoms also include obsessive talking and writing about gourmet foods, as well as consuming them. It can be triggered by a lesion in the right anterior brain."

emphasis mine

"Swiss brain scientists have collected several dozen cases of people who suddenly developed a passion for fine food after damage to a particular region of their brains.

Typically those who suffer from gourmand syndrome - if 'suffer' is the word - were indifferent to good food before their stroke, hemorrhage, tumor or injury."

--Seattle Post-Intelligencer, May 22, 1997

Let's take a tour of right now.

How we think of Body Modification

Transgressive, or cultural/subcultural customs Cosmetic

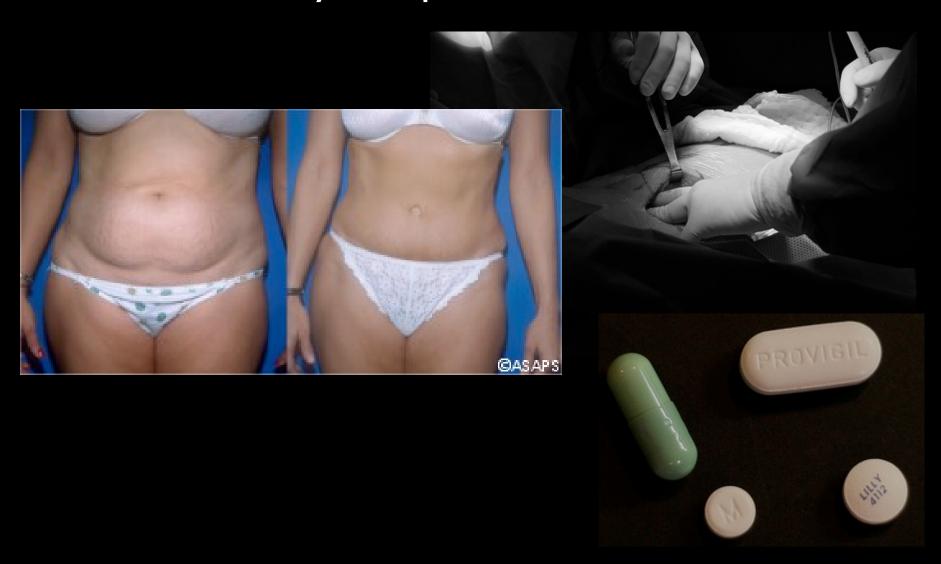

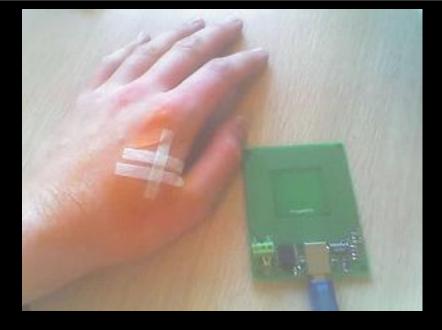

Medicine

Carefully triaged, controlled by complex laws and social norms

Society is the sum of our bodies,

Whatever would happen if a cognitive enhancer became widely available and cheap?

Unknowable, right? Nah, it's been done.

So what happened?

"Whereas it is most apparent that the multitude of Coffee Houses of late years set up and kept within this Kingdom... and the great resort of idle and disaffected persons to them, have produced very evil and dangerous effects... divers, false, malitious, and scandalous reports are devised and spread abroad to the Defamation of His Majesty's Government, and to the disturbance of the Peace and Quiet of the Realm..."

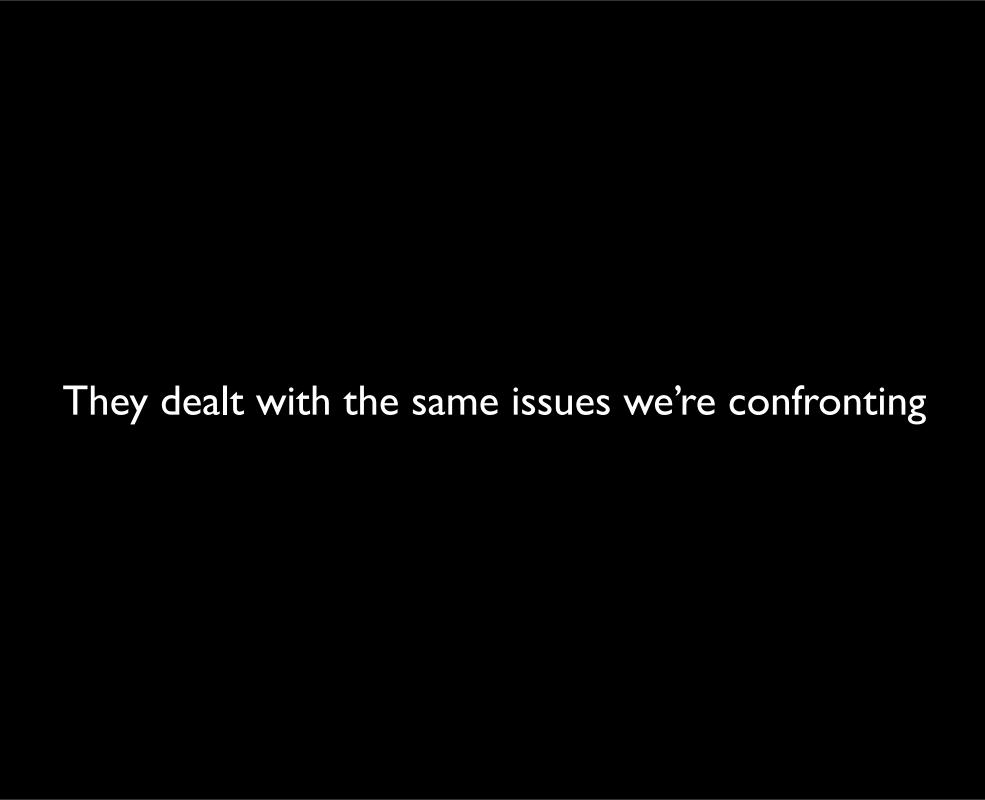

-Charles II

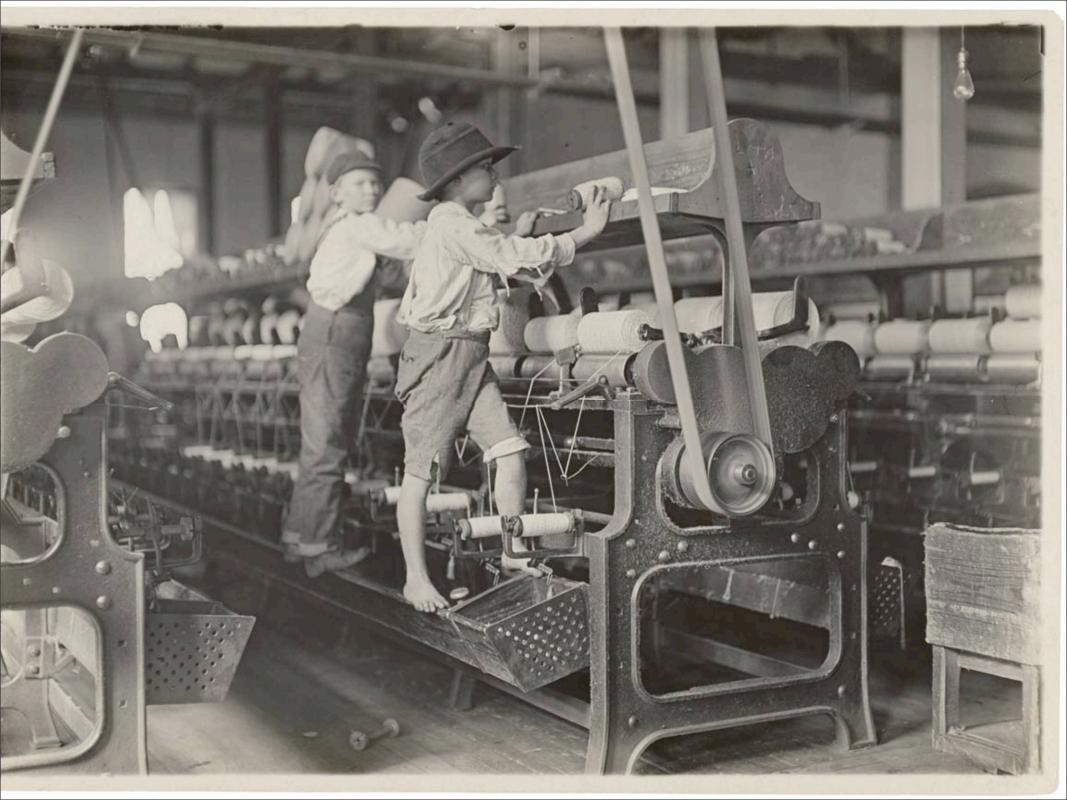

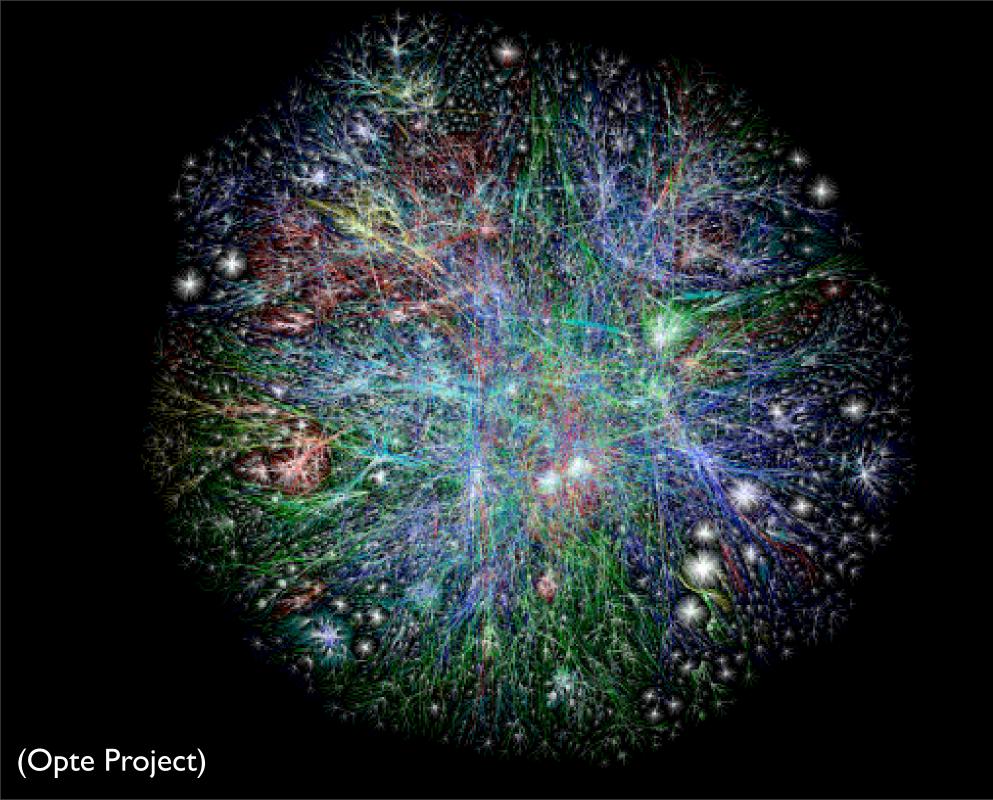

One big difference: Pill taking isn't social.

Cognitive enhancers are bad news for stable governments.

But like the people themselves, can governments give up the additional productivity and intellectual gain?

Improvements have to reach as far as possible.

The Human Condition:

Nasty, Brutish, and Short.

Pathology vs Challange

Why do some states of being become diseases,

While others are simply part of the Human Condition?

The Human Condition:

Not as
Nasty, Brutish, and Short
as it used to be.

Obesity becomes unhealthy.

Melancholy become depression, anxiety disorder, schizophrenia, and bipolar disorder.

Anti-depressants - required pathologizing grief

Stomach Staples - required pathologizing obesity

It's all shifting baselines...

Where does treatment end and enhancement begin?

Vaccination Every child a super being

What makes it one thing or another?

They're all just procedures.

Where does the Hippocratic oath fit in with elective, enhancing surgery?

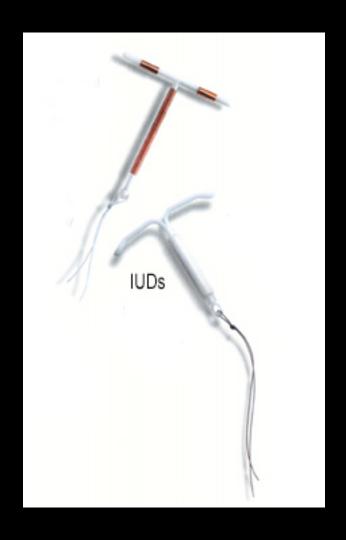

VS.

The Sexual Super Powers:

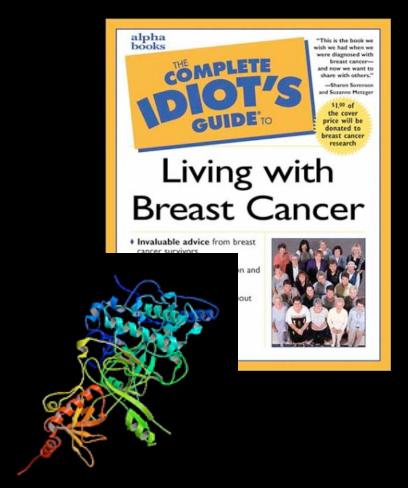

Boob Jobs
Gender reassignment
Sex enhancing drugs
IUDs

Democratizing our bodies

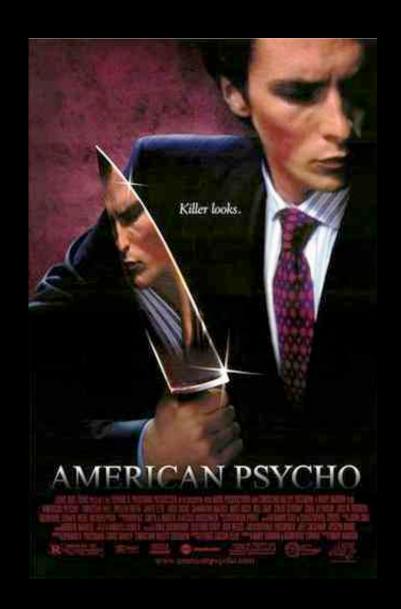

Are we ready for First Life furries?

What about people that want to edit out guilt and empathy?

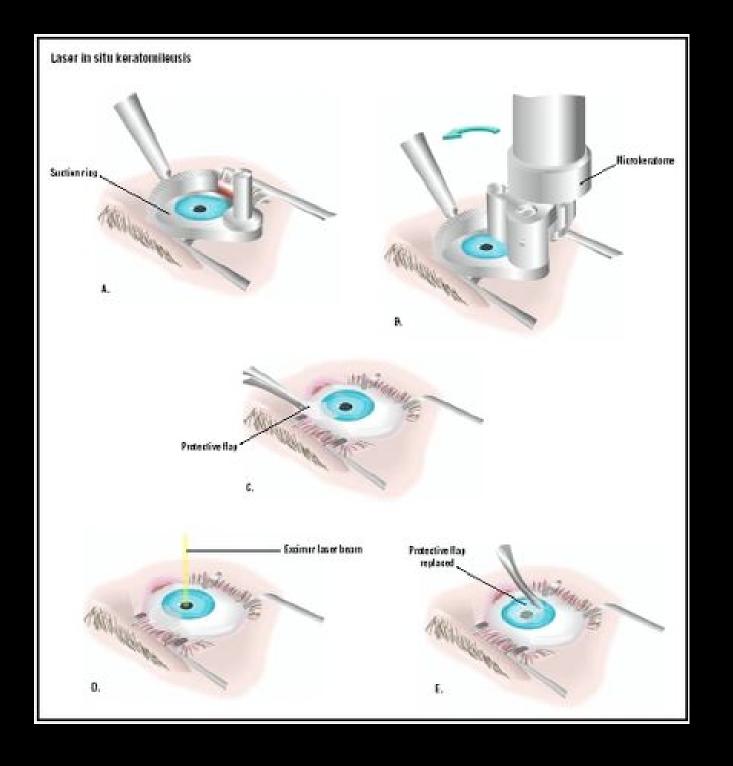

Ethics, Smethics

tom clifton

Lasik isn't cheating.

Even Tommy John surgery isn't cheating.

So why are steroids cheating?

Elective Home Surgery FAQ

This document replaces the 1998 Home Surgery Advice FAQ

Version: 0.01 Date: 01-16-2002

This FAQ is compiled by and copyright (c) 1998-2002 BMEZINE.COM Inc. For more information on heavy body modification, please visit www.bmezine.com or contact us at extreme@bmezine.com

Please note that this is an entirely preliminary version of this FAQ. To complete it, I need YOUR help. If you would like to answer the unanswered questions, expand the ones that are hear, add new questions, or correct errors, please contact Shannon at extreme@bmezine.com

INTRODUCTION

Why home surgery?

What is this FAO about?

Isn't is "wrong" to write an FAQ on this subject?

How can I judge whether a practitioner is qualified?

I think I'd prefer to see a doctor for my procedure. How can I find one that is willing?

I'd like to seek an underground practitioner. How do I find one?

I think I'd like to do it myself.

SECTION ONE - HOME STERILIZATION

Why is sterilization important?

What is cross-contamination?

Why are gloves important?

How can I create a "clean space" to work in at home?

Do I need to sterilize new (unused) tools?

Can I sterilize using fire?

Can I sterilize using alcohol?

Can I sterilize using bleach?

Can I use a pressure cooker to sterilize my tools?

What about chemical sterilization?

What about an autoclave?

What about single-use tools?

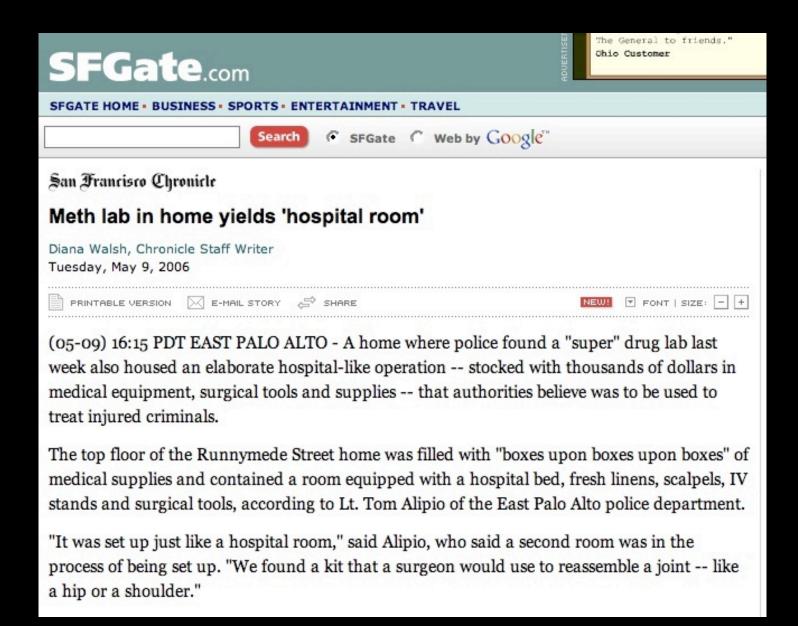

How should I dispose of my used sharp things?

How should I dispose or clean my used tools?

How should I dispose of bloody cause and other procedure waste products?

This is a mess

A future for medicine?
